About the Conference

The International Conference on Education Quality (ICEQ) has emerged as a prominent global platform bringing together educators, researchers, policymakers, and practitioners committed to advancing educational quality, inclusion, and innovation. Since its inception, ICEQ has fostered interdisciplinary dialogue and international collaboration around critical challenges shaping contemporary education systems.

The first six editions of ICEQ were successfully hosted at Ibn Zohr University in Agadir, Morocco, establishing a strong foundation for scholarly exchange. Subsequent editions expanded the conference's international reach, with the 7th edition held at the University of Worcester (UK), focusing on Universal Design for Learning (UDL), and the 8th edition in Dubai exploring artificial intelligence and future-oriented transformations in public organizations and education.

Building on this trajectory, from leadership, to inclusion, to technological transformation, the 9th edition of ICEQ will be hosted by Lovely Professional University (India), in partnership with Ibn Zohr University (Morocco) and the University of Worcester (UK). ICEQ 2027 aims to consolidate these perspectives and advance a holistic vision of transformative, equitable, and resilient education systems.

In this context, the conference also provides a valuable opportunity to further strengthen international academic engagement among the partner institutions. By bringing together a diverse community of scholars, practitioners, and policymakers, ICEQ 2027 will contribute to sustained dialogue, collaborative research initiatives, and the exchange of institutional practices. Such interactions are expected to support ongoing efforts in internationalization, enhance cross-institutional cooperation, and create pathways for future joint activities in research, teaching & capacity development, while reinforcing the global outlook of the participating universities.
